

My husband and I work 6.5 days a week - when we get home in the evening that is "our" time - We have the right not to receive annoying telephone calls during this time or any other time from telemarketers. If I want something, I will call that company and order it myself - I don't need someone leaving messages on my answering machine telling about something I don't want. My answering machine is for important calls from kids, grandkids, other relatives and friends - NOT TELEMARETERS & THEIR ASSOCIATES!!!
